

## WAVE GLIDER SUPPORT IN AUSTRALIA

Sales, Service and Operations

### Operational Support

UVS staff are experienced in critical launch and recovery operations and can advise and assist with mission planning and operational matters.

### Wave Glider Transport Case

Available in corrosion-free GRP or aluminium the Wave Glider Transport Case is designed to protect the Wave Glider vehicle for road and air transport under all conditions. The Transport Case includes stowage locations for items such as the Weather Station Mast, Wave Glider Purge Kit and documentation.

### Wave Glider Purge Kit

The Wave Glider Purge Kit provides a complete kit for nitrogen purge and pressurisation of the Wave Glider Command and Control Dry Box and Payload Box.

### Design and Integration of Payloads

The UVS engineering team has the experience and capability to assist with payload integration and installation design. Our engineering team has completed numerous integration tasks and has the field experience to ensure that the integration is successful.

**UVS provides support for all aspects of Wave Glider operations and maintenance in Australia.**

As a charter member of the Liquid Robotics Inc. Global Sales Network, UVS has developed significant experience and capability in Wave Glider sales, service and operations. Working with leading edge customers such as the Royal Australian Navy, UVS has developed maintenance and service methodologies that ensure that Wave Glider vehicles are always available to meet mission critical requirements.

UVS has worked together with the Royal Australian Navy to integrate a number of mission systems into Wave Glider hulls and continues to develop new methods and applications for Wave Glider technology.
