

UVS Awarded Sub-Contract for SEA1770

Newcastle, NSW, December 17, 2015 – UVS, A BlueZone Group company, has been awarded a \$7.2m sub-contract by Lockheed Martin Australia for provision of hydrographic systems and equipment for Australian Department of Defence Project SEA1770 Rapid Environmental Assessment – Maritime.

SEA1770 will equip deployable geospatial survey teams and mobile meteorological and oceanographic teams with environmental and survey sensors and communications and data transmission systems with Phase 1 focused on the maritime environment.

Clever Buoy Mk 2 Rides the Waves at Bondi

UVS has supported Shark Mitigation Services in the trial of the Clever Buoy shark detection system at Sydney's Bondi Beach. The system picks up on any animal two metres or longer within a 300-metre radius, sending a signal to lifeguards via an app on their phones. NSW Primary Industries Minister Niall Blair said it was part of his Government's \$16-million shark strategy.

Pipepod™ Leak Detection for Oil & Gas Pipelines

UVS is pleased to offer the Pipepod™ - a unique pressurised sound recording capsule designed for accurate leak detection solutions in water, gas and oil pipelines. The system incorporates the latest in hydrophone technology to accurately identify and record leakage points in pressurised pipe networks.

The data can be downloaded and overwritten onto CCTV inspection recordings to enable the operator to accurately detect leaks within a pressurised pipeline of all material types.

Pipepod™ can be retrofitted to any make or model of pipe inspection camera or crawler unit to improve client service delivery and incorporate leak detection.

Farewell to Jen Benson

It is very disappointing that we have to announce that, due to family commitments, Jen Benson (Technical Sales Manager, Newcastle) has resigned her position with the BlueZone Group and will be leaving at the end of February. We wish Jen well and our sales team in Newcastle, Melbourne and Perth remains in place to serve you.

Please feel free to contact our office if there are any ongoing projects that you wish to discuss with us - we want to ensure that our sales team can continue to meet your service expectations.

Perth Office Presents New Image

In the busy week of the Australian Oil & Gas exhibition our Perth team has found time to install new BlueZone Group signage at our offices at 41 Discovery Drive, Bibra Lake. Originally established as Underwater Video Systems in 1973 to service the Offshore Oil & Gas industry in Bass Strait with underwater inspection systems, UVS moved to Western Australia in the 1980s and evolved to maintain pace with customer requirements. As a member of the BlueZone Group, UVS now offers a complete range of ROV systems including the "hand carry" AC-ROV; the versatile SeaBotix range and the industry leading Saab Seaeye all-electric work class ROV suite.
