

BlueZone Group Birthday

BlueZone Group celebrated its first birthday this September with staff at all of our sites gathering for cake & coffee. Neil Hodges, BlueZone Group CEO, said that the grouping of ATSA Defence Services, UVS and UVS Trenchless under a common banner had been a success and enabled BlueZone to offer even more to our customers. "Many customers have now realised that the BlueZone Group offers a wide range of leading-edge technologies to diverse market areas," said Neil, "This gives us the capability to draw upon technologies from different markets to solve demanding problems for our customers operating in harsh environments".

Z-Boat at Army Innovation Day 2016

The versatile Teledyne OceanScience Z-Boat was selected for participation in Army Innovation Day 2016 (AID 2016) held on 12th October 2016 in Canberra. The lead theme for Army Innovation Day 2016 was 'manned and unmanned teaming for the soldier.'

BlueZone UVS proposed the innovative robotic Z-Boat to enable manned-unmanned teaming (MuMT) for a combined arms team in a joint environment in two roles: Riverine Scout Boat and River Gauging to Support Bridge Building.

Quality Products for Water Resources

BlueZone UVS was pleased to participate in the Australian Hydrographers Association 2016 Conference and Exhibition (AHA 2016) at Canberra responding to the theme: Better Management of Water Resources: Technology, Techniques and Applications.

UVS continues to innovate in the Water Resources field having developed the DL25 Extended Memory And Control Datalogger to enable long term data logging and remote control of Teledyne RDI Channel Master ADCPs. For more details see: <http://www.uvs.com.au/product-catalogue/water-resources/dl25-adcp-extended-memory-and-control>.

"The introduction of the Teledyne OceanScience Q-Boat for ADCP deployment in rivers has created opportunities for new techniques for river measurement," said Andrew, "Gathering river data can now be done safely from the river bank with no need to enter the water and with many options for flow measurement locations".

Farewell to Social Media Team

We bid farewell to Ingrid and Louis, whose mark on the BlueZone group's social media landscape will be eternal. We wish you well in the future.

Events

Please join UVS at these upcoming events!

We are keen to talk to you about how innovative new technologies offered by UVS can solve issues for your challenges in Australia's oceans, coastal seas and rivers.

We are happy to answer your questions and arrange on-site demonstrations and further discussion if required.

Greater Hunter Makers Festival

When Australia Makes, Australia Works!

BlueZone Group will participate in the inaugural Greater Hunter Makers Festival that will bring people and ideas together, showcasing the Hunter Region's world-class engineering and manufacturing capabilities.

Over 70 displays of ideas and creativity, designed to inspire, inform, connect and entertain thousands of attendees in a family-friendly environment.
