

## Merry Christmas from Us!

*See you in 2023*

The Team at BlueZone wish you a very Merry Christmas and a happy and safe new year! We look forward to seeing you all again in 2023. Our offices will re-open on 3rd January 2023.

## Christmas at BlueZone

*BlueZone Group celebrates 2022 bringing the entire team together*

The BlueZone Team are located all around Australia. The locations of our work enable us to offer local service to our customers wherever they are around the country. However, distance means we are very rarely all together.

In December 2022, we came together for a weekend in the Hunter valley, NSW, to celebrate a huge year and our growing team. It was the first opportunity for some of our team members to meet in person and it built on our already strong culture.

## BlueZone Group's New Engineering Manager

*Daniel Robins has been appointed Engineer Manager for BlueZone Group*

The BlueZone Team would like to congratulate Daniel Robins on his well-deserved promotion to Engineering Manager for BlueZone Group. The position oversees the engineering team and the projects they are working on, and we are sure he will excel in this role. Well done, Daniel!

Daniel has been a senior engineer with BlueZone for five years and has proven himself to be an exceptionally high standard of engineer as well as a highly valued team-member. The Team know he can always be relied upon, and his contribution is valued just as much by our customers and suppliers.

# AIDN Australian Sovereign Capability Showcase

*BlueZone exhibited at the AIDN Australian Sovereign Capability Showcase in Canberra ACT*

The BlueZone Team sponsored and attended the AIDN Australian Sovereign Capability Showcase at Parliament House in Canberra ACT, in November 2022. The event highlighted the critical role the Australian defence industry plays in contributing to Australia's sovereignty, security, and safety.

A highlight of the event was hearing from Brent Clarke. Mr Clarke spoke well about defence industry and SMEs engaging with Defence. He is a strong advocate of true economic value of sovereign offerings versus the apparent cost savings of continuing to buy from overseas OEMs

## New Products & Services

### DeepSea LED SeaLite Housing Update

*Robust Industry Workhorse and Configurable for any Application*

DeepSea have changed the final coating of the LED SeaLite products to a hard natural anodize. The new coating specifications will be similar with respect to the toughness and corrosion resistance of the resulting surface finish, with the natural DI seal process proving marginally better. The new coating features will change the housing from matte black to a dark grey & dark olive-green appearance. Due to the design changes to the products, internal part number will also be changed.
